2. ifdefs

1. ifdefs
2. colors

Tasks for both phases are equivalent; the changes for the 2. phase are in parenthesis.

Tasks for 1./2. Phase

S1 (S4)

In which files occurs the Feature

CONFIG_XENO_OPT_STATS (CONFIG_XENO_OPT_PRIOCPL) vor?

S2 (S5)

Do the Features CONFIG_XENO_OPT_PRIOCPL and CONFIG_XENO_OPT_SCHED_SPORADIC (CONFIG_XENO_OPT_WATCHDOG and CONFIG_PROC_FS) share code?

S3 (S6)

File: xenomai/include/nucleus/sched.h

(xenomai/ksrc/nucleus/pod.c)

Which features occur in this file?

Group *colorsIf*: worked in the first phase with colors, in the second phase without colors

Group *ifdefsCo*: worked in the first phase without colors, in the second phase with colors

Corresponding box plots have the same color, e.g. the blue box (time S1) compares the time subjects needed to complete the task S1; the left blue box denotes the time of subjects that worked with the color version in the first phase, the right blue box of subjects that worked with the ifdef verison

Comparing response time of tasks of the first phase

Only significant differences for S1 and S2 (values are smaller than 0.05); group with colors (colorslfdefs) was faster in the first phase.
